

EXECUTIVE SUMMARY

Sheikh Hasina Medical College, Tangail (SHMCT) was established in 23 february 2014. There are over 325 undergraduate students of different disciplines are studying in SHMCT. There are also around 53 students are getting training as intern doctor in SHMCT. At present 65 students are admitted each year for MBBS course.

However, there are lots of new problems which should be minimized and solved with utmost attention and sincerity.

ACHIEVEMENT:

1. All activities of different phases worked satisfactorily.
2. Continuous participation of the students of all phases was being held according to curriculum.
3. Institutional Review Committee (IRC) has been formed by academic council.
4. Undergraduate classes were held regularly according to academic calendar.
5. Classes throughout the year were held regularly without significant interference.
6. Professional examinations were held in scheduled time.
7. Integrated teaching of final year students has been a regular program throughout the year.
8. Regular clinico-pathological seminars were held according to weekly schedule.
9. Extra academic activities by students & teachers held for maintaining healthy educational environment of the campus.
10. Logistic for teaching learning like, multimedia, laptop, photocopier have been provided to many departments and the present status is much better than the previous year.
11. In an overall Quality Assurance Scheme (QAS) activities ran very smoothly.

LIMITATIONS:

1. Supporting staffs such as nurse, out sourcing staffs of the college and medical college hospital at present are not sufficient enough to meet up the present demand and work load. So that we cannot continue our medical college hospital's activities as well.
2. Space for teaching learning exercise, training and assessment is inadequate in clinical and preclinical areas.

RECOMMENDATIONS:

1. The most time demanding events like Good Clinical Practice (GCP) and Standard Operation Procedure (SOP) not held yet. We recommend for such.
2. Supporting staffs should be available for smooth running of daily administrative and other heavy work load.
3. Students should participate in small group teaching and PBL (problem based learning).
4. Internet facilities to the department should be provided by the college/hospital side.

I thank Principal for initiating the effort. I also thank from the bottom of my heart to junior colleagues for the untiring efforts.

MISSION STATEMENT

Sheikh Hasina Medical College, Tangail aspires to produce medical professionals having excellent knowledge and wisdom and skills with a high quality of professionalism and leadership qualities in an enabling environment.

Sheikh Hasina Medical College, Tangail has its social commitment for continuous endeavors to develop human resources in an effort to maintain the highest standard of service to the humanity and community at large, to maintain ethical and professional standards and integrity and contribute significantly to medical science through collective efforts in a goal cherished by all.
